DIRECTIONS FOR HOW TO ACCESS DIGITAL FILE ON GOOGLE DRIVE

HOW TO ACCESS...

This file is hosted on Google Drive. You will need to click the button below or type the URL that is listed below into your URL search bar on your browser. The link will "force a copy" of the file to your Google Drive so you have access to it forever. After you have opened the link once, you will not need to continue to open the link again and again. Instead, simply go to your Drive and find the file there. The file is titled "Animal Report Templates".

All of your students will need a copy of the file to edit. I recommend using Google Classroom to share the file with them. Then they can open it in Slides and edit to complete their report. The next page includes details on how to use Google Classroom.

If you have any trouble accessing the file or using it in your classroom, please reach out to me at help@cassiedahl.com Thank you for your purchase of this digital resource.

When you click the button to the left, you will see this message pop up. You will need to click "Make A Copy" to add this file to your Google Drive.

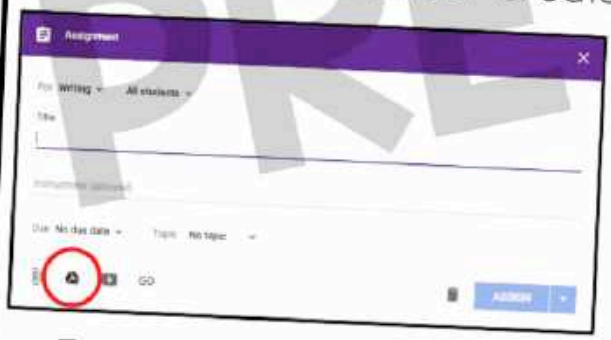
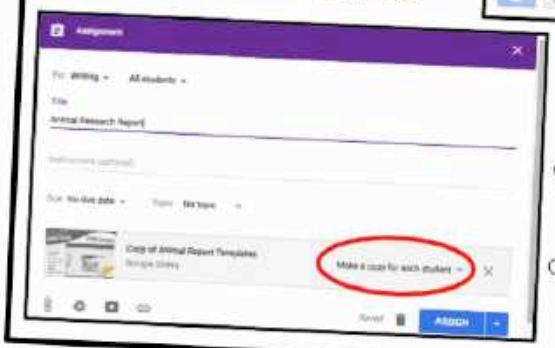
USING GOOGLE CLASSROOM TO SHARE:

You will need to have a Google Classroom set up with your students assigned to the classroom. Click the plus sign in the bottom right corner and select "Create Assignment"



In the new assignment window, select the Drive Icon in the bottom toolbar.

Find the templates either under your "recent" or "my drive" tab. Select the file so that a blue line surrounds the file.



CRUCIAL STEP!

Change the file settings to "Make a copy for each student". This way each student will have their own copy of the file instead of them each editing the same file.

ADDITIONAL INFO

- Included in this pack are a few planning pages. for both you and your students. There are 15 slide templates included. I do not recommend having students complete all 15! That would take a long time and some of the information may be repeated. Instead, I would choose your top 8-10 slides to have them complete.
- There is a scoring rubric included to help you grade student reports. The rubric is designed to be printed with two rubrics per page to save on printing. There are two versions included.
- You will need to decide how you want your students to cite their sources. In the video, I sh to copy/paste the URL of a photograph into their to use APA or MLA citation
- When students are finishe they delete the Student Di not use for their report.
- When all students have c to have students share! This is a great opportun learned and their slidest organized.
- If you wish to send ho to see, simply have stu multiple slides to one p to "Print Settings and in the top toolbar and page or Handout - 9 s decrease the amount
